

PUSH-TO-CONNECT FITTINGS

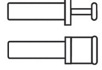

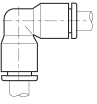

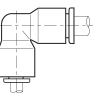

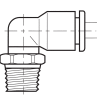

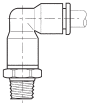

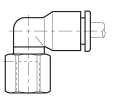

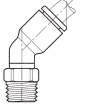

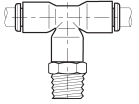

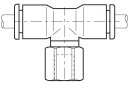

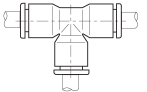

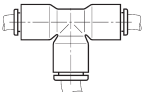

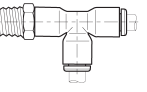

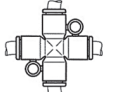

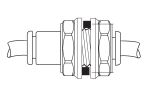

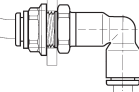

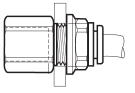

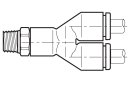

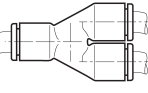

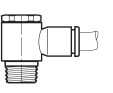

Brennan's line of Push-To-Connect pneumatic fittings allow for instant connections just by pushing the tube into the fitting. No tools are necessary, and disconnections are just as easy. These universally adapted fittings are ideal for both mobile and in-plant applications involving compressed air. Available in both poly and nickel-plated brass, they're offered for metric tubes with BSP threads in taper, parallel and metric form.

Brennan's Push-To-Connect fittings come in a wide range of body designs and configurations including brass DOT — from 1/8" to 1/2" diameters and all feature the same consistent quality you've come to expect from Brennan.
